## **Deus Ex Machina**

Could a child

Already be born as a winner?

Determination and passion made it all

Man and steel
Heart and machine as one
Flying high in the lanes
To glorify his soul

The dark horse

Drank all his fury

Expelling his demons

And feeding his impetus

Defying himself
His life was the limit
"You are not immortal"
Said the gaulish rival

The red and white

Reveals his force and power

The idol is complete

With one nation in hands

The acts of a man

Are greater than himself

Victory and glory marked forever his name

## **Easy Rider**

Like road warriors - On horses of steel

Armors of leather - With liberty to feel

Follow your path - With no regrets

Follow your heart - To far away

Like fallen angels - We live on the road

Each mile traveled - Will fuel my soul

Follow your path - With no regrets

Follow your heart - To far away

Like a furious dragon

The motor roars

And gasoline

Pumped in my veins

Searching my way

In the wind

Easy Rider - On the road

Always riding - it's in the blood

Easy Rider - girl on my tail

Old Jack in hand - whiskey in throat

Easy Rider - living to ride

Always riding - whiting your life

Easy Rider - until death comes

Old Jack in hand - good day to die - Searching my way in the wind

## The Wrath of Kron

The plague devasted the earth
Children without future implore
For the Gods that passively cry
Where is the warrior of fire?

The wrath of Kron was ruthless

A dense black cloud covered the earth

Storms, lightings and fire

Where is the warrior of fire?

Combat the hate and don't die

Kron the evil – the killer

Fight against the power of the spirits

Kron the evil – the killer

The plague devastated the earth

The time was worthless

The wind carries away the remains of destruction

Kron has brought the new order
